

## Press release

### New consulting specialist for combined transport Oswald and Osond found **GOMULTIMODAL**

(Hamburg, 13 May 2013)

1 June 2013 will see the launch of **GOMULTIMODAL** GmbH (Hamburg), whose slogan is "Think Multimodal – **GOMULTIMODAL**." At its helm the new consultancy company will have two experienced experts, well reputed in the market, as partners: Gerhard Oswald (61) and Wolfgang Osond (52). **GOMULTIMODAL** will be engaged in questions of combined transport as well as intermodal transport concepts right across the board.

Until 31 May 2013 Oswald will still be managing director of TFG Transfracht, a subsidiary of DB Mobility Logistics AG. For thirty years in this company he has gained management experience in all areas of combined transport (road, rail and inland waterways). Among his other responsibilities, he was in charge of designing and marketing the "Albatross Express", which remains the biggest European seaport-hinterland network for rail-road combined transport. Since 2012 he has also been chairman of the advisory board of the German Promotion Center for Intermodal Transport (Studiengesellschaft für den Kombinierten Verkehr e.V. (SGKV)). Osond also has 35 years' experience in the maritime supply chain and in combined transport, of which he spent 25 years in management positions at various logistics companies in Austria. Since January 2009 he has headed his own company LOGconsulting, Henndorf (Austria), focusing on logistics consultancy, staff recruitment and staff development. LOGconsulting will act as a partner of **GOMULTIMODAL** GmbH

**GOMULTIMODAL's** services will be designed for sea and inland port operators, quay, terminal and handling companies, shipping lines, freight carriers, transport companies, operating companies, rail and inland-waterway companies, industrial and trading companies as well as government institutions, associations and public bodies, whenever it comes to shifting from road transport to intermodal transport and to optimizing existing combined-transport systems. Particular attention will be given to shifting continuous road transports as well as to developing existing national and international transport schemes.

"The more than sixty years of joint professional experience enjoyed by the two partners, and their broad network, will offer the very best prospects for well-qualified and successful consultancy and realization", is Oswald's comment on the intended launch.

**GOMULTIMODAL** is the specialist consultant for national and international combined transport and seaport-hinterland transport in Europe. Its services are designed for users and providers as well as for government institutions, for associations and public bodies. Its range includes consulting, personnel services, and representation.
